No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1991 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

CONTENTS OF VOLUME 289

Number 1, August 15, 1991

COMMUNICATIONS

- An Assessment of the Role of Proton Leaks in the Mechanistic Stoichiometry of Oxidative Phosphorylation
E. Jack Davis and W. I. A. Davis-van Thienen 184
- Phosphorylation of RII Subunit and Attenuation of cAMP-Dependent Protein Kinase Activity by Proline-Directed Protein Kinase
Ruedi K. Braun, P. Richard Vulliet, Denise A. Carbonaro-Hall, and Frederick L. Hall 187
- Recombinant Type A Rat 75-kDa α -Amidating Enzyme Catalyzes the Conversion of Glycine-Extended Peptides to Peptide Amides via an α -Hydroxyglycine Intermediate
David J. Merkler and Stanley D. Young 192

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

- Modulation of Collagen Synthesis by Growth Factors: The Role of Ascorbate-Stimulated Lipid Peroxidation
Jeffrey C. Geesin, Laura J. Hendricks, Joel S. Gordon, and Richard A. Berg 6
- Inhibition of Oxygen-Dependent Radiation-Induced Damage by the Nitroxide Superoxide Dismutase Mimic, Tempol
James B. Mitchell, William DeGraff, Dwight Kaufman, Murali C. Krishna, Amram Samuni, Eli Finkelstein, Min S. Ahn, Stephen M. Hahn, Janet Gamson, and Angelo Russo 62
- Isolation of Human Salivary Polymorphonuclear Leukocytes and Their Stimulation-Coupled Responses
Masazumi Yamamoto, Kiyomi Saeki, and Kozo Utsumi 76
- The Superoxide Dismutase Activities of Two Higher-Valent Manganese Complexes, Mn^{IV} Desferrioxamine and Mn^{III} Cyclam
James D. Rush, Zofia Maskos, and W. H. Koppenol 97
- Immunochemical Study of Subunit VI (M_r 13,400) of Mitochondrial Ubiquinol-Cytochrome c Reductase
Shigeyuki Usui, Linda Yu, James Harmon, and Chang-An Yu 109
- Nitric Oxide as an Antioxidant
Joseph Kanner, Stela Harel, and Rina Granit 130
- Reduction of Paraquat and Related Bipyridylum Compounds to Free Radical Metabolites by Rat Hepatocytes
Janice A. DeGray, D. N. Ramakrishna Rao, and Ronald P. Mason 145
- Free Radical Formation in the Oxidation of Malondialdehyde and Acetylacetone by Peroxidase Enzymes
C. Mottley, R. E. Robinson, and Ronald P. Mason 153

BIOPHYSICAL CHEMISTRY AND X-RAY CRYSTALLOGRAPHY

- Interactions of Triply Phosphorylated Human β -Casein: Fluorescence Spectroscopy and Light-Scattering Studies of Conformation and Self-Association
George T. Javor, Satish M. Sood, Pat Chang, and Charles W. Slattery 39
- The Structure of Human Acidic Fibroblast Growth Factor and Its Interaction with Heparin
Robert A. Copeland, Hanlee Ji, Anne J. Halfpenny, Robert W. Williams, Karen C. Thompson, Wayne K. Herber, Kenneth A. Thomas, Mark W. Bruner, James A. Ryan, Dorothy Marquis-Omer, Gautam Sanyal, Robert D. Sitrin, Shigeko Yamazaki, and C. Russell Middaugh 53

ENZYME STRUCTURE, MECHANISMS, AND REGULATION; CELLULAR REGULATION

- Hill Coefficient Ratios Give Binding Ratios of Allosteric Enzyme Effectors; Inhibition, Activation, and Squatting in Deoxycytidylate Aminohydrolase (EC 3.5.4.12)
Edward P. Whitehead, Roberto Nucci, Carlo Vaccaro, and Mose' Rossi 12
- Allosteric Modifier and Substrate Binding of Donkey Deoxycytidylate Aminohydrolase (EC 3.5.4.12)
Roberto Nucci, Carlo A. Raia, Carlo Vaccaro, Mose' Rossi, and Edward P. Whitehead 19

Amphibolic Role of the Krebs Cycle in the Insulin-Stimulated Protein Synthesis	<i>Chandra Mohan, Riaz A. Memon, and Samuel P. Bessman</i>	83
Reversible Inactivation of Recombinant Rat Liver Guanidinoacetate Methyltransferase by Glutathione Disulfide	<i>Kiyoshi Konishi and Motoji Fujioka</i>	90
Free Radical-Induced Alterations of Myocardial Membrane Proteins	<i>Narasimham L. Parinandi, Craig W. Zwizinski, and Harald H. O. Schmid</i>	118
The pH Dependence of the Action Pattern in Porcine Pancreatic α -Amylase-Catalyzed Reaction for Maltooligosaccharide Substrates	<i>Kazuhiko Ishikawa, Ikuo Matsui, Koichi Honda, Shoichi Kobayashi, and Hiroshi Nakatani</i>	124
Inhibition of Rat Brain Prostaglandin D Synthase by Inorganic Selenocompounds	<i>Fakhrul Islam, Yasuyoshi Watanabe, Hiroshi Morii, and Osamu Hayaishi</i>	161
Superoxide Dismutase Triggers Activation of "Primed" Platelets	<i>L. Iuliano, D. Praticò, A. Ghiselli, M. S. Bonavita, and F. Violi</i>	180

LIPIDS AND LIPID MEDIATORS

Mechanism of Cobalt (II) Ion Inhibition of Iron-Supported Phospholipid Peroxidation	<i>Yoshiko Tampo and Masanori Yonaha</i>	26
A Possible Mechanism of Mitochondrial Dysfunction during Cerebral Ischemia: Inhibition of Mitochondrial Respiration Activity by Arachidonic Acid	<i>Yuko Takeuchi, Hiroshi Morii, Mamoru Tamura, Osamu Hayaishi, and Yasuyoshi Watanabe</i>	33
Lipid Peroxide Makes Rabbit Platelet Hyperaggregable to Agonists through Phospholipase A ₂ Activation	<i>Tsutomu Hashizume, Hiroyoshi Yamaguchi, Akihiko Kawamoto, Akira Tamura, Takashi Sato, and Tatsuzo Fujii</i>	47
Physical Studies on Membrane Lipids of <i>Bacillus stearothermophilus</i> Temperature and Calcium Effects	<i>Amália S. Jurado, Teresa J. T. Pinheiro, and Vítor M. C. Madeira</i>	167

MEMBRANE PROTEINS, TRANSPORT, AND CELL SIGNALING; CYTOKINES AND RECEPTORS

Expression of the Mouse Macrophage Cystine Transporter in <i>Xenopus laevis</i> Oocytes	<i>Tetsuro Ishii, Kazuhisa Nakayama, Hideyo Sato, Kenji Miura, Makoto Yamada, Kazuo Yamada, Yoshiki Sugita, and Shiro Bannai</i>	71
Hormone-Induced Phosphorylation of the Plasma Membrane Calcium Pump in Cultured Aortic Endothelial Cells	<i>Kevin K. W. Wang, Yeng Sheng Du, Clement Diglio, Wayne Tsang, and Tuan H. Kuo</i>	103

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

Detection of a Trypsin-like Serine Protease and Its Endogenous Inhibitor in Hake Skeletal Muscle	<i>Celina B. Martone, Liliana Busconi, Eduardo J. E. Folco, and Jorge J. Sánchez</i>	1
Carbohydrate-Binding Specificity of Calcyclin and Its Expression in Human Tissues and Leukemic Cells	<i>Fu-Yue Zeng and Hans-Joachim Gabius</i>	137

Number 2, September 1991

BIOLOGICAL OXIDATIONS, BIOENERGETICS, AND P450 REACTIONS

The Kinetic Mechanism of Ubiquinol: Cytochrome c Reductase at Steady State	<i>Mauro Degli Esposti and Giorgio Lenaz</i>	303
--	--	-----

- Prevention of Nitrofurantoin-Induced Cytotoxicity in Isolated Hepatocytes by Fructose
José M. Silva, Larry McGirr, and Peter J. O'Brien 313
- Biochemical Characteristics of Alveolar Macrophage-Specific Peroxidase Activities in the Rat
Isabelle de Mendez, K. Randall Young, Jr., Jean Bignon, and Claude R. Lambré 319
- Flavoenzymes Reduce Vanadium(V) and Molecular Oxygen and Generate Hydroxyl Radical
Xianglin Shi and N. S. Dalal 355

ENZYME STRUCTURE, MECHANISMS, AND REGULATION; CELLULAR REGULATION

- Separation and Partial Characterization of Enzymes Catalyzing δ -Aminolevulinic Acid Formation in *Synechocystis* sp. PCC 6803
Siegfried Rieble and Samuel I. Beale 289
- A Comparative Study of the Microsomal S6 Phosphatase and Phosphorylase Phosphatase Activities in Rat Liver
Gabriela M. M. Stephenson 324
- Affinity Labeling of a Subsite of Taka-amylase A by the Fluorescent Reagent *o*-Phthalaldehyde
Mikihiko Kobayashi, Masami Miura, Takehiko Watanabe, and Eiji Ichishima 350
- Protein Phosphatase-1 and -2A, Kinase F_A, and Casein Kinase II in Skeletal Muscle of Streptozotocin Diabetic Rats
Antonio Metallo and Emma Villa-Moruzzi 382
- Heme Regulates Hepatic 5-Aminolevulinate Synthase mRNA Expression by Decreasing mRNA Half-Life and Not by Altering Its Rate of Transcription
Joshua W. Hamilton, William J. Bement, Peter R. Sinclair, Jacqueline F. Sinclair, Joy A. Alcedo, and Karen E. Wetterhahn 387

GLYCOCONJUGATES; PROTEOGLYCANS AND EXTRACELLULAR MATRICES

- The 43-kDa Glycoprotein from the Human Pathogen *Paracoccidioides brasiliensis* and Its Deglycosylated Form: Excretion and Susceptibility to Proteolysis
Rosana Puccia and Luiz R. Travassos 298

LIPIDS AND LIPID MEDIATORS

- Mechanism for the Generation of Superoxide Anion and Singlet Oxygen during Heme Compound-Catalyzed Linoleic Acid Hydroperoxide Decomposition
Satoshi Koga, Minoru Nakano, and Kiyoshi Uehara 223
- Regulation of Fatty Acid β -Oxidation in Rat Heart Mitochondria
Hang-Yong Wang, Charles F. Baxter, Jr., and Horst Schulz 274
- Peroxisomal Fatty Acid β -Oxidation in HepG2 Cells
Paul A. Watkins, Edward V. Ferrell, Jr., Jan I. Pedersen, and Gerald Hoefler 329

MEMBRANE PROTEINS, TRANSPORT, AND CELL SIGNALING; CYTOKINES AND RECEPTORS

- Studies of the Thermal Inactivation of Cardiac Adenylyl Cyclase: Evidence for a Conformational Change in the Reaction Mechanism
Robert A. Colvin and Richard A. Allen 337
- Vanadate Modulates the Activity of a Subpopulation of Asialoglycoprotein Receptors on Isolated Rat Hepatocytes: Active Surface Receptors Are Internalized and Replaced by Inactive Receptors
Janet A. Oka and Paul H. Weigel 362
- Inhibition of Iron Uptake in HL60 Cells by 2-Formylpyridine Monothiosemicarbazonato Cu(II)
Jana Narasimhan, William E. Antholine, Christopher R. Chitambar, and David H. Petering 393

PLANT BIOCHEMISTRY AND MOLECULAR BIOLOGY

- Flavonol Ring B-Specific *O*-Glucosyltransferases: Purification, Production of Polyclonal Antibodies, and Immunolocalization
Lilian Latchinian-Sadek and Ragai K. Ibrahim 230
- Two Genes Encode the Two Subunits of Cottonseed Catalase
Weiting Ni and Richard N. Trelease 237

The Use of Monoclonal Antibodies to Study the Structure and Function of Cytochrome <i>f</i>	
<i>E. L. Gross, S. Molnar, A. Curtiss, R. A. Reuter, and S. P. Berg</i>	244
Purification and Characterization of Alanine Aminotransferase from <i>Panicum miliaceum</i> Leaves	
<i>Daeyoung Son, Jinki Jo, and Tatsuo Sugiyama</i>	262
Characterization of the Constitutive and Wound-Inducible Monoterpene Cyclases of Grand Fir (<i>Abies grandis</i>)	
<i>Mark Gijzen, Efraim Lewinsohn, and Rodney Croteau</i>	267
Characterization of a Soluble Inorganic Pyrophosphatase from <i>Microcystis aeruginosa</i> and Preparation of Its Antibody	
<i>Charmaine B. H. Kang and Kwok Ki Ho</i>	281
Regulation of C ₄ Photosynthesis: Modulation of Mitochondrial NAD-Malic Enzyme by Adenylates	
<i>R. T. Furbank, A. Agostino, and M. D. Hatch</i>	376

PROTEIN STRUCTURE AND FUNCTION; PROTEASES, PROTEIN TURNOVER, AND POST-TRANSLATIONAL PROCESSING

Purification and Characterization of a Fibrinolytic Enzyme from Venom of the Southern Copperhead Snake (<i>Agkistrodon contortrix contortrix</i>)	
<i>Alex L. Guan, Anastassios D. Retzios, George N. Henderson, and Francis S. Markland, Jr.</i>	197
Correlation of Secondary Structure with Biological Activity for a Leader Peptide: Circular Dichroism-Derived Structure and <i>in Vitro</i> Biological Activities of Preproparathyroid Hormone Peptide and Its Analogs	
<i>Michael P. Caulfield, Kyusung Park, Michael Rosenblatt, and Gerald D. Fasman</i>	208
Purification and Characterization of Catalytically Active Precursor of Rat Liver Mitochondrial Aldehyde Dehydrogenase Expressed in <i>Escherichia coli</i>	
<i>Jiingjau Jeng and Henry Weiner</i>	214
Calcium-Dependent Autophosphorylation of the Glucose-Regulated Protein, Grp78	
<i>Thomas Leustek, Hector Toledo, Nathan Brot, and Herbert Weissbach</i>	256
Demonstration of a Factor in Fraction I of Reticulocyte Lysates Necessary for the Steady State Accumulation of Ubiquitin Conjugates of Des-75-76-ubiquitin	
<i>Shakti Bamezai and Esther Breslow</i>	343
Oxidation of the Active Site of Glutamine Synthetase: Conversion of Arginine-344 to γ -Glutamyl Semialdehyde	
<i>Isabel Climent and Rodney L. Levine</i>	371

TRANSCRIPTIONAL CONTROL; MEMBRANE-NUCLEUS SIGNAL TRANSDUCTION; PROTEIN-DNA INTERACTION

Hydralazine Differentially Increases mRNAs for the α and β Subunits of Prolyl 4-Hydroxylase whereas It Decreases Pro α 1(I) Collagen mRNAs in Human Skin Fibroblasts	
<i>Heather N. Yeowell, Saood Murad, and Sheldon R. Pinnell</i>	399

AUTHOR INDEX FOR VOLUME 289	406
-----------------------------	-----

NOTICE

The Subject Index for Volume 289 will appear in the December 1991 issue as part of a cumulative index for the year 1991.

Archives of Biochemistry and Biophysics is an international journal dedicated to the dissemination of fundamental knowledge in all areas of biochemistry and biophysics. **Communications** and **regular manuscripts** that contain new and significant information of general interest to workers in these fields are welcome. Sufficient detail must be included to enable others to repeat the work.

Communications offer a means of early publication of work of such importance that rapid publication is warranted. They should not exceed 15 double-spaced typed manuscript pages in length (including text, bibliography, tables, and figures). To expedite review and processing of communications, authors should send them directly to an Executive Editor most closely associated with the subject category of the communication. Communications sent to the Editorial Offices of the journal (see below) will be assigned to an Executive Editor.

Manuscripts should be written in clear, concise, and grammatical English and should be submitted in quadruplicate (one original and three photocopies), including four sets of original figures or good quality glossy prints, to:

Archives of Biochemistry and Biophysics

Editorial Office
Seventh Floor
1250 Sixth Avenue
San Diego, California 92101

Failure to receive the required number of copies of the manuscript may delay review. All copies of halftone artwork *must* be glossy prints or originals; photocopies of halftones do not show sufficient detail to be used for the review process. *In the case of rejected manuscripts only one copy of the manuscript will be returned to the author.*

For nucleotide sequence data authors are encouraged to submit original nucleotide or amino acid sequence data to a databank such as GenBank or EMBL. A footnote that includes the accession number should be included on the title page. It is preferable that the sequence data be deposited either prior to submission or by the time of acceptance of the manuscript. However, a footnote can be added at the proof stage if the material is deposited after acceptance. For further information please contact the editorial office or GenBank or EMBL directly.

Original papers only will be considered. ***Manuscripts are accepted for review with the understanding that the same work has not been published, that it is not under***

consideration for publication elsewhere, and that its submission for publication has been approved by all of the authors and by the institution where the work was carried out. It is the responsibility of the corresponding author to obtain the agreement of all the coauthors of the manuscript prior to its submission to the journal. Abstracts of oral or poster presentations are not considered to constitute previous publication. Presentation of material in preliminary communications normally will not preclude publication of a full paper in *Archives*, provided that the full paper contains additional information that justifies its publication and does not repeat the presentation of the same data that supported the preliminary communication. The manuscript should be accompanied by copies of all preliminary communications and of all relevant manuscripts that are in press or under editorial consideration by another journal. Authors must verify the wording of any cited personal communication with the persons who supplied the information and obtain approval for the use of their names in connection with the quoted information or for the citation of unpublished work; written evidence of such approval should accompany the manuscript. All material published in *Archives* represents the opinions of the authors and should not be construed to reflect the opinions of the Editors or the Publisher.

Authors should suggest competent reviewers in their field and may also suggest individuals whom they wish to have excluded from the review process. The corresponding author will receive a decision letter from the Executive Editor. Revised manuscripts and correspondence concerning such manuscripts should be sent to the Executive Editor at the address indicated on the decision letter. Revised manuscripts should be accompanied by a copy of the unrevised version.

Many acceptable papers require minor revision or condensation. It is in the mutual interest of both the authors and the journal that amended manuscripts be returned promptly. A revised paper will retain its original date of receipt only if it is received by the Executive Editor within 2 months of the date of return to the author.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Form of manuscript. Manuscripts should be typewritten and double-spaced throughout on one side of 8.5 × 11-in. white paper, with 1-in. margins on all sides. All pages should be numbered consecutively.

Subject Areas. Authors should specify on page 1 of the manuscript the Subject Area of the article submitted:

Biological Oxidations, Bioenergetics, and P450 Reactions
Glycoconjugates; Proteoglycans and Extracellular Matrices

¹ An extended Instructions to Authors is published in the January issue of *Archives of Biochemistry and Biophysics*. Reprints are available from the Editorial Office upon request. Authors should consult the extended Instructions for details on nomenclature, IUPAC-IUB rules and recommendations, and accepted abbreviations.

Lipids and Lipid Mediators
 Biophysical Chemistry and X-Ray Crystallography
 Membrane Proteins, Transport, and Cell Signaling; Cytokines and Receptors
 Enzyme Structure, Mechanisms, and Regulation; Cellular Regulation
 Plant Biochemistry and Molecular Biology
 Protein Structure and Function; Proteases, Protein Turnover, and Post-Translational Processing
 Transcriptional Control; Membrane-Nucleus Signal Transduction; Protein-DNA Interaction

Page 1 should contain the article title, author(s), affiliation(s), a short running title (abbreviated form of title) of less than 65 characters including letters and spaces, the appropriate subject category for listing in the Table of Contents, suggestions for index list entries, and the name, complete mailing address, and telephone and fax numbers of the person to whom correspondence should be sent.

Page 2 should contain a short abstract of 50–250 words.

Editorial style should conform to the *Handbook for Authors* (American Chemical Society).

Footnotes to the text should be identified by superscript Arabic numerals and should be typed double-spaced on a separate sheet: footnotes to tables should be identified by superscript lowercase italic letters (*^{a,b}*, etc.) and placed at the bottom of the table.

Tables should be numbered with Roman numerals and cited consecutively in the text. Each table should be titled and typed double-spaced on a separate sheet. Units must be clearly indicated for each of the entries in the table.

Authors can submit complex tables and mathematical material as camera-ready copy. In this way, they are spared multiple, tedious proofreadings and the chance of error is reduced. Tables submitted as camera-ready copy should be typed single-spaced whenever possible and preferably submitted as 5 × 7-in. glossy prints.

Figures should be cited consecutively in the text by Arabic numerals. Legends should be typed double-spaced on a separate sheet. All figures and illustrations are to be submitted in such form as to permit photographic reproduction without retouching or redrawing. They should be planned to fit the proportion of the printed page ($7\frac{1}{8} \times 9$ in.; column width, 3.5 in.) and submitted no larger than 8.5 × 11 in. Lettering on drawings should be of professional quality or generated by *high-resolution* computer graphics and should be large enough (10–12 points) to take a reduction of 50–60%. Drawings should be made with black India ink on tracing linen, smooth-surface white paper, or Bristol board. Alternatively, *high-quality* computer graphics may be acceptable. Graph paper, if used, should be ruled in blue. Glossy prints of figures properly prepared are acceptable. Illustrations in color can be accepted only if the authors defray the cost.

References should be cited in the text by an Arabic numeral in parentheses and listed at the end of the paper in numerical order typed double-spaced on a separate sheet. Abbreviations

of journal titles should conform to those of *Chemical Abstracts Service Source Index*, 1985. Please note the following examples.

1. Webster, K. D., and Anders, M. W. (1989) *Arch. Biochem. Biophys.* **273**, 562–571.
2. Stein, W. D. (1986) *Transport and Diffusion across Cell Membranes*, Academic Press, San Diego.
3. Magnani, J. L., Spitalnik, S. L., and Ginsburg, V. (1987) in *Methods in Enzymology* (Ginsburg, V., Ed.), Vol. 138, pp. 195–207, Academic Press, San Diego.

Miniprint supplements are an effective way of presenting supportive data. They are printed from plates made by photographic reduction from typed pages provided by the author. Types of data that have been published as miniprint supplements include analyses relevant to studies of amino acid or polynucleotide sequences, details of chemical syntheses, preparation of enzymes, extended statistical or mathematical discussions, and X-ray diffraction data. The miniprint supplement is published in the journal, immediately following the parent paper, and is included in the reprints. Since the miniprint supplement is produced from camera-ready copy supplied by the authors with no redaction or editorial changes it is important that the copy be letter perfect and conform to the style of the journal. *Authors will not be permitted to make changes to the miniprint supplement at the proof stage. Any changes necessary in the proof must be made as a typeset "Note added in proof."*

Proofs will be sent to the author, with a reprint order form. Authors will be charged for extensive alterations.

Reprints. Fifty reprints of each article will be provided free of charge. Additional reprints may be purchased.

Personal computer disks. Manuscripts may be submitted to *Archives of Biochemistry and Biophysics* on personal computer disks after the manuscript has been accepted and after all revisions have been incorporated onto the disk. Please supply the file as a straight ASCII file with generic codes specified by the publisher. Label the disk with the type of computer used, the type of software and the version number, and the disk format. All tabular and mathematical material will be typeset conventionally. Art must be prepared as camera-ready copy; see the section on Figures earlier in this Information for Authors.

A hard copy printout of the manuscript that exactly matches the disk file must be supplied. Academic Press will not accept disks without accompanying printouts of all files on the disk. File names must clearly indicate the content of each file. The manuscript will be edited according to the style of the journal, and the proofs must be read carefully by the author. Disks that are not translatable or economical to process will not be used. The publisher reserves the right not to use the disk.

For further information on preparing the disk for typesetting conversion and a list of generic codes, please contact the publisher (Associate Director, Journal Division, Academic Press, 1250 Sixth Avenue, San Diego, California 92101; telephone: 619 699-6415; fax: 619 699-6800).

Biochemical Medicine and Metabolic Biology

AN INTERNATIONAL JOURNAL

Editor

Edward R. B. McCabe

Baylor College of Medicine, Houston, Texas

Associate Editor

Chandra Mohan

University of Southern California, Los Angeles

Founding Editor

S. P. Bessman

University of Southern California, Los Angeles

The primary goal of **Biochemical Medicine and Metabolic Biology** is the improvement in the understanding of the metabolic basis of disease. The journal publishes articles describing investigations using the tools of biochemistry and molecular biology for studies of the normal and diseased state. In addition to original research articles, occasional mini-reviews reporting timely advances, as well as brief communications and letters to the Editor, will be considered for publication.

Volumes 45-46 (1991), 6 issues

ISSN 0885-4505

In the U.S.A. and Canada: \$260.00

All other countries: \$306.00

Research Areas Include

INHERITED METABOLIC DISEASES

- Biochemical studies of the primary enzymatic defect
- Molecular genetic analyses of the mutations
- Pathogenesis of these disorders including not only primary, but also secondary, metabolic alterations

INTERCELLULAR AND INTRACELLULAR METABOLIC RELATIONSHIPS

- Biochemical interactions between cells
- Functional roles of, and interactions between, subcellular compartments and distinct regions within these cellular spaces, termed microcompartments
- Metabolic relations between individual enzymes and pathways

CELLULAR CATALYSTS

- Protein and nonprotein catalysts in normal and deranged cellular metabolism
- Relationships between the structure and function of catalytic molecules
- Interaction of these catalysts with other cellular components
- Underlying mechanisms of, and metabolic perturbations associated with, inherited and acquired diseases
- Relationships between genotype and phenotype at the biochemical and molecular level
- Strategies for the metabolic improvement of patients using classical drug and dietary intervention, as well as more novel approaches such as transplantation and gene therapy

Sample copies and privileged personal rates are available on request. For more information, please write or call:

ENCYCLOPEDIA OF HUMAN BIOLOGY

**Prepublication
Price
Available
Now!**

Editor-in-Chief

Renato Dulbecco

Nobel Laureate and President, The Salk Institute, La Jolla, California

The **Encyclopedia of Human Biology** is the only reference devoted exclusively to the biology of humans. It comprehensively covers anthropology, behavior, biochemistry, biophysics, cytology, ecology, evolution, genetics, immunology, neurosciences, pharmacology, physiology, toxicology, and much more.

Features and Benefits Include:

- ◆ 8 volumes, including a 50,000-entry subject index published simultaneously
- ◆ Approximately 6600 pages
- ◆ More than 700 contributors
- ◆ 620+ articles
- ◆ 2000 illustrations
- ◆ 50 color plates
- ◆ 900 tables
- ◆ 3600 bibliographic entries
- ◆ 4800 glossary entries
- ◆ Internationally renowned Advisory Board with members from the United States, Japan, Great Britain, Germany, and more
- ◆ 11 Nobel Laureates as members of the Board

Encyclopedia of Human Biology
8 volumes, including subject index,
\$1,950.00/March 1991

Prepublication price: \$1,750.00
(Expires March 1991)

Write for a FREE brochure!

It Offers:

- ◆ Practicing scientists in all settings an up-to-date, authoritative, and reliable resource for preparing grant proposals and research papers, and background information on important, wide-ranging biological topics
- ◆ College preparatory, undergraduate, and graduate students a one-stop source that will assist them with their course work, term papers, and dissertations
- ◆ Researchers working in peripheral areas a concise explanation of the key issues and background reading suggestions in a given area
- ◆ Educated general readers a broad spectrum of accurate, current information on all aspects of human biology

Coming In March 1991
